DATE: November 23, 1982

SUBJECT: Final Agenda for 1 December Hearing on MX/CSB

Attached is a summary of the final agenda for our 1 December hearing on intelligence questions related to the MX/ICBM basing decision. I hope this will minimize confusion as to what the Committee would like to hear.

Please provide Dot Roberson, our Chief Clerk, with a list of all the personnel (and their clearances) from your agency who will be attending the session by noon, 30 November.

Thanks very much for all your help in this matter.

SECRET

With these concerns in mind, we have asked the DCI's representative, [redacted] who is the National Intelligence Officer for Strategic Programs, to explain the Intelligence Community's activities relevant to the CSB decision-making process. [redacted] will provide the Committee with a 40-minute discussion of the following issues, noting where there are any slight differences among the various intelligence agencies. Experts from CIA, DIA, and Air Force Intelligence are seated at the witness table to elaborate on these differences, if asked.

25X1

Following [redacted] testimony, Maj. General John B. Marks, Assistant Chief of Staff of the Air Force for Intelligence, will elaborate his Agency's views on a few of these points for fifteen minutes.

Following the Intelligence Community's presentations, Maj. General Harry A. Griffith, Director of the Defense Nuclear Agency, will briefly discuss DNA's role in the development of projections of CSB survivability. Dr. Eugene Sevin will then elaborate how DNA has developed its assessments of ICBM silo vulnerability. This part of the session should run approximately 40 minutes.
